How healthy is your website?

This audit checks for key SEO, performance, and security issues. Below is a breakdown of the areas that may need improvement.

Top Issues Found

- Missing meta description on homepage
- Images lack alt attributes
- Slow page load time (over 3s)
- No SSL certificate detected

Optimize SEO

Improve metadata, alt tags, and use structured data.

Boost Performance

Compress images, enable lazy loading, and minify code.

Secure Your Site

Install an SSL certificate and keep software updated.
